## Professional Summary

Full Stack Developer with hands-on experience in Angular, Java Spring Boot, TypeScript React and Laravel delivering maintainable and efficient software solutions. Demonstrated autonomy by independently developingt in personal and real client projects. Proactively expanded expertise by learning modern technologies including Next.js and Spring Boot through projects and ongoing training. Skilled in REST API development, database optimization (MySQL, PostgreSQL), and agile methodologies (Scrum). Effective collaborator with strong communication skills, focused on delivering high-quality software in dynamic environments.

## Skills

**Technical**: Angular, Java, Spring Boot, React, TypeScript, Unit Testing, PHP, MySQL, REST APIs, PostgreSQL, Scrum, Agile Methodologies, Git, GitHub, Authentication & Authorization, Database Management, Version Control, UI/UX Design, Mobile Application Development, Web Application Development, Software Development Lifecycle (SDLC), Cloud Deployment, JIRA
**Soft**: Problem Solving, Effective Communication, Teamwork, Adaptability, Time Management, Analytical Thinking, Collaboration, Agile Teamwork, Client Communication, Critical Thinking

## Work Experience

**Full Stack Developer** – Xerintel Internet Technologies          *Jun 2025 – Present  |  Jerez de la Frontera (Cádiz) - Hybrid*

- Developed mobile applications with web technology using Angular, SCSS and TypeScript on the frontend and PHP (Laravel) on the backend, ensuring maintainable code and high performance, improving user experience and application responsiveness.
- Designed, developed, and consumed RESTful APIs, managing and optimizing relational databases (MySQL, PostgreSQL) for improved data integrity and query performance.
- Led feature development and contributed to codebase refactoring and improvements, demonstrating increased proficiency, reliability, and code maintainability.
- Developed features independently, demonstrating autonomy, ownership, and delivering high-quality software solutions on schedule.
- Actively participated in the full software development lifecycle (SDLC) under agile methodologies (Scrum) using Jira for sprint planning, development, testing, and deployments.
- Effectively managed long and complex tasks within short timeframes, applying critical thinking to ensure timely delivery, maintain code quality, and meet project deadlines.

**Physiotherapist** – Clínica Fi          *May 2022 – Oct 2025  |  San Fernando (Cádiz)*

- Developed strong analytical, problem-solving, and client communication skills, contributing to effective team collaboration and data-driven decision making, resulting in an 83% patient improvement rate.

**Frontend Developer** – Proyecto Final DAM          *Mar 2025 – May 2025  |  Remote*

- Developed the web frontend in React based on prototypes designed in Figma, applying UI/UX best practices.
- Monitored backend development with Java and Spring Boot, following RESTful architecture.
- Integrated with MySQL database to ensure data consistency and performance.
- Used Git (GitHub) for version control, enabling effective team collaboration.
- Coordinated tasks, reviewed code, and shared progress with remote team members.
- Applied clean code principles and design patterns while developing REST APIs, utilizing Java 17 features such as pattern matching and records for improved maintainability.

# Projects

### School Manager
*Nov 2025 – Ongoing*

- A full-stack learning project built with React (frontend) and Java Spring Boot (backend). The goal is to practice modern web application development from end to end, including REST API design, authentication and clean architecture. This project serves as my first complete full-stack project and will evolve as I progress through new concepts.
- Developed the web frontend in React based on prototypes designed in Figma, applying UI/UX best practices.
- Monitored backend development with Java and Spring Boot, following RESTful architecture.
- Integrated with MySQL database to ensure data consistency and performance.
- Used Git (GitHub) for version control, enabling effective team collaboration.
- Applied clean code principles and design patterns while developing REST APIs, utilizing Java 17 features such as pattern matching and records for improved maintainability.
- Implemented unit testing with JUnit to ensure code quality and reliability throughout the development lifecycle.

### Personal portfolio website
*Nov 2025 – Ongoing*

- Designed and developed a personal portfolio website using Next.js and React, showcasing professional projects and skills to attract job opportunities and collaborations.
- Implemented advanced features such as EmailJS for contact forms and redesigned key sections to enhance user experience and visual appeal.
- Managed version control using Git and GitHub, and deployed the site on Vercel for reliable cloud hosting.
- Continuously improved the website with iterative updates using VS Code as the primary development environment.

### Basic CRUD on Spring Boot
*Nov 2025 – Nov 2025*

- Independently developed a full CRUD application using Java and Spring Boot, gaining hands-on experience in backend development and RESTful API design.
- Performed thorough testing and validation using Postman to ensure application reliability and data integrity.
- Utilized IntelliJ IDEA for development and managed source control with Git and GitHub, following best practices for clean code and versioning.

# Education

**Instituto IFP** – Barcelona, Spain (Online)  *September 2023 - September 2025*
*Higher Level Vocational Training in Multiplatform Application Development*

Object-oriented programming with Java, mobile application development with Android Studio, relational database management (SQL), frontend development with HTML and CSS, interface design with Figma (UI/UX), and introduction to game development with C# and Unity.

**Universidad de Cádiz** – Cádiz, Spain  *September 2018 - June 2022*
*Bachelor's Degree in Physiotherapy*

Effective communication and personalized patient management; multidisciplinary teamwork and continuous improvement focus; analytical thinking and diagnosis; time management and prioritization; documentation and clinical case follow-up.

# Certifications

**Full Stack Web Developer Bootcamp (JSCamp)** – JSCamp  *Oct 2025 – Ongoing*

**Specialization course in Spring Framework 6 and Spring Boot 3** – Udemy  *Aug 2025 – Ongoing*

# Languages

Spanish (Native proficiency), English (B2 - Upper-Intermediate proficiency, professional working level)
