SUMMARY

Full Stack Developer specializing in **Angular** and **Java Spring Boot**. Proven track record delivering high-quality features for real clients independently. Focused on scalable Full Stack development, clean code, and performance.

EXPERIENCE

Full Stack Developer
Xerintel Internet Technologies   June 2025 – Present, Jerez de la frontera, Cádiz
· **Engineered and deployed 3+ cross-platform mobile applications** using **Angular, TypeScript, and SCSS,** focusing on modular component architecture and responsive design to enhance user engagement.
· **Delivered complex software solutions independently** under tight deadlines, demonstrating high ownership and critical thinking.
· **Collaborated in high-performance Agile teams (Scrum)**, actively participating in the full SDLC and utilizing **Jira** for precise sprint planning.

Physiotherapist
Clínica Fi   April 2022 – October 2025, San Fernando, Cádiz
· Developed strong **analytical**, **problem-solving**, and **client communication** skills.
· Contributed to effective **team collaboration** and **data-driven decision making**, resulting in an **83%** patient **improvement** rate.
· Piloted tailored rehabilitation plans by closely evaluating patient needs, coordinating with interdisciplinary teams to support optimal recovery and enhance overall clinic outcomes.

PROJECTS

Product manager
GitHub · github.com/jmoreno-dev/product-manager · January 2026 – Present
· **Developed a dynamic Product Management dashboard** using **Angular (v21)** implementing **Signals** and a 100% responsive user interface.
· **Architected a RESTful API with Java Spring Boot and Spring Data JPA**, enabling core **CRUD** operations and ensuring reliable data persistence within a relational database (**MySQL/PostgreSQL**).
· **Established seamless Full Stack integration** by consuming backend services via **Angular HttpClient**.

Java Spring Boot CRUD
GitHub · github.com/jmoreno-dev/first-crud-springboot · November 2025 – November 2025
· **Engineered a robust student management backend** using **Java and Spring Boot**, implementing **Spring Data JPA** to manage data persistence and complex object mapping within a relational database.
· **Developed a RESTful API following the Controller-Service-Repository pattern**, ensuring a modular architecture, clear separation of concerns, and high code maintainability.
· **Integrated an MySQL database for reliable data storage** and utilized **Postman** for comprehensive API testing to validate endpoint performance and data integrity throughout the development lifecycle.

CERTIFICATIONS

Java Foundations & Object-Oriented Programming (15h)
Udemy · 2026

Angular: From zero to hero (34h-Ongoing)
Udemy · 2026

EDUCATION

Higher Level Vocational Training in Multiplatform Application Development
IFP · Barcelona, Spain · 2025 · 9.31

Grade in Physiotherapy
University of Cádiz · Cádiz, Spain · 2022

SKILLS

Technical Skills: Angular, Java, Spring Boot, TypeScript, React, JavaScript, HTML, CSS, SCSS, Git, PHP, Laravel
Soft Skills: Team Collaboration, Teamwork, Time Management, Client Communication, Decision Making, Critical Thinking, Problem Solving
Languages: Spanish (Native proficiency), English (B2 – Upper-Intermediate proficiency, professional working level)
